TFS

EDUCATION

Master of Software Development course Sela college

WORK EXPERIENCE

Kakal - Team leader
2023 – Now
* Directed the comprehensive design and specification of the entire system while overseeing programming team schedules. Took full responsibility for task management, ensuring timely and successful completion.
* Taking decisions regarding code architecture, design and efficiency, assisting the development team with complex tasks.

Capitolis - Back end developer
2022 – 2022
* Solely managed the maintenance and development of an expansive system, serving as the backbone for some of the largest banks and hedge funds globally.
* Being responsible of the server. Taking care of the features, bugs and integrity of the system

Mprest/Iron dome - Full stack developer
2021 – 2022
* Responsible for maintenance and expansion of the system that identifies and intercept airborne threats.
* Control large scale desktop application by fix end-to-end bugs and analyze features.
* Built the cameras and sensors communication platform, which allow objects and sky threats detection.

Sella group - Full stack developer + lecturer
2019 – 2021
* Implementing new features in the GUI, creating new functionality and maintain corresponding UI testing on the desktop application.
* Expand and improve the server to contain the necessary API to provide the necessary data and get the right input.
* Teaching one-on-one and full-classes lessons, practicing frond and back end, servers, clouds, data bases and more
* Built an android app using angular nativescript, implementing google maps SDK and using firebase for server, DB and storage. The app is called Tripper and is free on google play.
